

US Claim Amendments

Claim 1. (Currently Amended) A vehicle sun visor comprising a sun visor main body that comprises~~includes~~:

an external frame attached to the interior of a vehicle via a supporting shaft; and

a plate member releasably attached in such a position so as to occupy an open window penetrating a central portion of the external frame, wherein ~~characterized in that~~:

the external frame has a sliding structure that~~which~~ allows the plate member to be slidably attached.

Claim 2. (Currently Amended) A vehicle sun visor as set forth in claim 1, wherein ~~characterized in that~~ the sliding structure comprises: [[has]]

an insertion opening provided along a side of the external frame, and

a sliding groove for slidably engaging at least an outer edge of the plate member inserted through the insertion opening.

Claim 3. (Currently Amended) A vehicle sun visor as set forth in claim 2, wherein:

a cover cap is provided at the insertion opening to restrict movement of the plate member ~~by the cover cap~~.

Claim 4. (Currently Amended) A vehicle sun visor comprising a sun visor main body that comprises~~includes~~:

an external frame attached to an interior of a vehicle via a supporting shaft; and

a plate member releasably attached in such a position so as to cover an open window located at a central portion of the external frame, wherein ~~characterized in that~~:

the external frame comprises a concave portion, and

the plate member comprises a corresponding convex portion,

wherein the engagement between the concave portion and the convex portion allows an attachment and detachment of the plate member to and from the external frame.

Claim 5. (Currently Amended) A vehicle sun visor as set forth in claim 1 ~~any one of claims 1 through 4, wherein~~ ~~characterized in that~~ the plate member comprises~~includes~~

[[a]] at least one sheet having a design, and

[[a]] at least one transparent plate ~~or plates~~ disposed on at least one face ~~or both faces~~ of the at least one sheet.

Claim 6. (Currently Amended) A vehicle sun visor as set forth in claim 1 ~~any one of claims 1 through 4, wherein~~ ~~characterized in that~~ the plate member comprises a light transmissibility controlling plate~~includes a semi-transparent plate or a~~

~~perforated plate.~~

Claim 7. (New) A vehicle sun visor as set forth in claim 2 wherein the plate member comprises:

at least one sheet member having a design, and
at least one transparent plate disposed on at least one face of the at least one sheet.

Claim 8. (New) A vehicle sun visor as set forth in claim 4 wherein the plate member comprises:

at least one sheet member having a design, and
at least one transparent plate disposed on at least one face of the at least one sheet.

Claim 9. (New) A vehicle sun visor as set forth in claim 6, wherein the light transmissibility controlling plate is a semi-transparent plate.

Claim 10. (New) A vehicle sun visor as set forth in claim 6, wherein the light transmissibility controlling plate is a perforated plate.

Claim 11. (New) A vehicle sun visor as set forth in claim 4 wherein the plate member comprises a light transmissibility controlling plate.

Claim 12. (New) A vehicle sun visor as set forth in claim 11,
wherein the light transmissibility controlling plate is a
semi-transparent plate.

Claim 13. (New) A vehicle sun visor as set forth in claim 11,
wherein the light transmissibility controlling plate is a
perforated plate.

Claim 14. (New) A vehicle sun visor as set forth in claim 1,
wherein the plate member comprises at least one plate providing
the performance of at least one function.

Claim 15. (New) A vehicle sun visor as set forth in claim 14,
wherein the at least one plate provides a cardholding function.

Claim 16. (New) A vehicle sun visor as set forth in claim 4,
wherein the plate member comprises at least one plate providing
the performance of at least one function.

Claim 17. (New) A vehicle sun visor as set forth in claim 16,
wherein the at least one plate provides a cardholding function.

Claim 18. (New) A vehicle sun visor comprising a sun visor main
body that comprises:

an external frame attached to the interior of a vehicle
via a supporting shaft;

a plate member releasably attached in such a position
so as to at least fill an area of an open window surrounded
by the external frame; and

a cover cap;

wherein the external frame comprises a sliding structure
that slidingly attaches the plate member to the external frame,

wherein the sliding structure comprises:

an insertion opening provided along a side of the
external frame; and

a sliding groove for slidably engaging at least
an outer edge of the plate member inserted through the
insertion opening;

wherein the cover cap is provided at the insertion opening
to restrict movement of the plate member.

Claim 19. (New) A vehicle sun visor as set forth in claim 18,
wherein the plate member comprises:

at least one sheet member having a design, and

at least one transparent plate disposed on at least one
face of the at least one sheet.

Claim 20. (New) A vehicle sun visor as set forth in claim 18
wherein the plate member comprises a light transmissibility

controlling plate.
